  - SQL
  - Vertica Database
- **Technical knowledge on Cloud and Big Data.**

## ACHIEVEMENTS

- Won **Pratibha Award** from the Government of Andhra Pradesh.
- Computer Science Department Topper with highest CGPA and awarded with **Gold Medal**.

## PROJECT

**Project Name:** A perceptive hybrid model for specialized system in malware detection

**Role:** Team Leader

**Size:** 5 Project

**Description:**

- As online social networks have emerged as popular communication for internet users, malicious attacks are specifically targeting online social networks are also on rise.
- In this scenario, we aim in the advancement of a hybrid specialized system in the identification of malware using the Artificial Intelligence and fuzzy system approach and FRAppE which is a detection engine.

- We develop the web application which uses this technology and determines the malware via posts done by the user. If the post possesses any malware, that malware through those posts gets deleted and particular user gets blocked. Thus, we restrict those malicious users again sign into our platform with the same account.

## STRENGTHS

---

Leadership Skills, Good Communication skills, Time management, Team work

## HOBBIES

---
